

Human mobility, whatever its scale, is often controversial. Hence it carries with it the potential for politics. A core feature of mobility politics is the tension between the desire to maximize the social and economic benefits of migration, and pressures to restrict movement. Transnational communities, global instability, advances in transportation and communication, and concepts of 'smart borders' and 'migration management' are just a few of the phenomena transforming the landscape of migration today. The tension between openness and restriction raises important questions about how different types of policies and politics come to life and influence mobility.

*Mobility & Politics* invites original, theoretically and empirically informed studies for academic and policy-oriented debates. Authors examine issues such as refugees and displacement, migration and citizenship, security and cross-border movements, (post-)colonialism and mobility, and transnational movements and cosmopolitics.
